

Word Wall Kit

Musical Terms Flashcards with Definitions

The Word Wall Kit is a set of 100 musical term flashcards with definitions. The terms contained in the kit are those that are most commonly used in elementary music programs. The terms are sorted into categories such as dynamics, notation and tempo. The categories are color coded and each word is numbered to help the teacher find specific words quickly. On one side of the flashcard the musical term is shown and the complete definition is given on the opposite side. There are 2 flashcards printed on each piece of card stock. Simply cut them in half on a paper cutter and use! If you have a laminator, they could be laminated, but they will be durable even without lamination.

You can use the flashcards as flashcards, or you can use them to set up a musical word wall. Information on setting up word walls, and photos of word walls included in the kit.

Word Wall Kit #AL3 \$30 Canadian and US

Setting Up a Word Wall

There are many creative ways to design a word wall. Some teachers create portable word walls out of folding cardboard or shower curtains. Some teachers even create word walls for each student. The most important element in setting up a word wall is that the words are clearly posted for students to see, so that they are able to recognize and recall words they have studied. Word walls can be used interactively to promote group learning and cooperation. The words chosen for the word wall should be gradually added over time. The purpose is for students to see examples of how the words can be used, be able to explain the words and practice using the words in many

different contexts, such as games.

The Word Wall Kit can be used for students in grades 1 to 8 and the musical terms are commonly used in elementary music programs. There are 100 musical words sorted into the following categories: articulation, dynamics, tempo, musical genres, notation, expression, styles-period, musical form, texture, melody-harmony and more! This kit also includes the most common musical symbols your students will encounter.

The musical categories are color coded and each word is numbered to help the teacher find specific words quickly. Each flashcard has the term on one side and the complete definition on the other. Included in this kit are fun and interactive game ideas for using the Word Wall Kit in your classroom. This kit includes instructions on how to create word walls and also includes pictures and displays of word walls that can be quickly and easily set up in your classroom.
