

Powerpoint Music Lessons for Smartboard

Do you have a Smartboard or Computer and Projector in your classroom?

We are creating PowerPoints to accompany many of our products for use in classrooms with electronic whiteboards or computer/projectors.

Our electronic editions feature music that has been re-formatted to fit the screen. Our music will be larger and easier to read because we've sized the page to correctly fit on a PowerPoint slide. There are many advantages to using a PowerPoint presentation in the music classroom:

- * easier for the teacher to show a PPT than to hand out student textbooks to each child
- * visually appealing to children, more engaging, easier to focus students' attention
- * text highlights in short songs teach beginning reading in the same way that pocket chart reading activities do
- * PowerPoints provide shared reading practice for all grades: Music notation and lyrics only are included
- * print space and cost does not limit the length or scope of the presentation - we've included more visuals, full color, full vocal scores and lyrics
- * easily highlight concepts

PowerPoints are available for or included with the following products:

Musicplay K-6 Music Program PowerPoints

We now have PowerPoints for every song (800+ songs!) and important concepts in the curriculum. Beta versions of the PowerPoints are available now. Schools ordering the beta versions will receive a reduced price (\$125 per grade level), and will receive the powerpoints now AND when the fully edited versions are available, the fully edited PowerPoints. Each grade level includes 100+ PowerPoints.

PPT-BetaK	Musicplay Kindergarten PowerPoints	\$125
